

Speech Treatment for Parkinson Disease: *The Science and Practice of LSVT LOUD[®]*

You are invited to attend a two-hour interactive seminar on speech disorders and speech treatment for people with Parkinson disease (PD).

This seminar is FREE so it is a wonderful opportunity for people with PD, family members and friends, and other healthcare professionals who want to learn more about speech and PD to attend.

The seminar will include a 1-hour lecture presented by world experts in speech treatment for people with Parkinson disease. This lecture will be followed by an interactive session where participants with Parkinson disease are invited to interact with speech clinicians practicing vocal exercises (this is optional for participants).

When: Friday, August 16, 2019

12:00 – 1:00 p.m. Lecture (detailed below) and Refreshments
1:00 – 2:00 p.m. Interactive Exercise Session (Optional)

Where: **Columbia University, Teachers College (TC)**

Thorndike Hall

ROOM TO BE DETERMINED

ENTER 525 W 120th St, New York, NY 10027

This seminar is offered FREE OF CHARGE. Registration is limited.

Lecture Summary

At least 89% of individuals with Parkinson disease (PD) have a speech or voice disorder which can negatively impact quality of life. This presentation will:

1. Present the background and motivation for voice treatment in Parkinson disease.
2. Describe the creation of an efficacious treatment, LSVT LOUD and efficacy data.
3. Report on unexpected outcomes and discoveries.
4. Discuss application of principles of LSVT to intensive whole body amplitude-based training protocol for individuals with Parkinson disease (LSVT BIG[®]).
5. Demonstrate innovative technology to enhance accessibility of treatment for all people with PD who can benefit.

This research was funded, in part, by the National Institutes of Health and Michael J. Fox Foundation.
